Excellence line CONTACT – E & CONTACT - duo

Operating Instructions Contact E und Contact E duo/hot

1. General:

1.1. Product designation:	Contact E	230 V / 115 V	416-1000
	Contact E duo	230 V / 115 V	416-2000
	Contact E hot	230 V / 115 V	416-0000

1.2. Scope of delivery:

Contact E	Contact E duo	Contact E hot
1 Handpiece with connecting cable 1 Handpiece Clamp 1 Modelling tips PKT 2 1 Power supply unit	2 Handpieces with connecting cable 2 Handpiece Clamps 2 Modelling tips PKT1 + PKT 2 1 Power supply unit	Contact mit Dust cover and power supply unit

1.3. Manufacturer address: YETI Dentalprodukte - Industriestraße 3 - D-78234 Engen
Tel.: +49-7733-9410-0 FAX: +49-7733-9410-22
info@yeti-dental.com www.yeti-dental.com
further operating instructions and declarations of conformity

1.4. Warenzeichen - Vermerke: Patent

1.5. Performance features: Mains voltage : 100-240V +/- 10%
Mains frequency: 50/60 Hz
type / mains plug: German/Euro
Power consumption: 9-12 W
Protection class: Protective Insulation

1.6. Installation and storage conditions: - set up horizontally
- store dry at room temperature
- Protection against acids and alkalis

2. Use as intended:

Our Contact E and Contact E hot serve exclusively for the processing of modelling waxes, which are intended for dental technology. Not approved for use on humans! All warranty and liability claims will become void if the device is not used as intended!

Contact E, Contact E duo and Contact E hot are used as modelling stations for waxes. The wax chips adhere magnetically to the metal plate and are protected by a transparent dust cover. The left half of the metal plate is heated with a fixed temperature and can be switched on or off separately. Contact E and Contact E duo additionally contain 1 or 2 handpiece connections on the device. These can be regulated continuously and separately

3. Risks and dangers in the application:

1. ensure that persons not familiar with the equipment (e.g. children) do not come into contact with the equipment Only dental technicians or persons authorized and instructed by the laboratory owner are authorized to work with our units. Before starting up the Contact E units, the Technicians should read the operating instructions and contact the manufacturer if they are still unclear.
2. operate the equipment only in dry workplaces, clean only dry and do not place in water-filled containers.
3. Caution: Danger of burns when touching the heating rod and the modelling probes.
4. do not cover/pack the unit when heated.

Operating Instructions Contact E und Contact E duo/hot

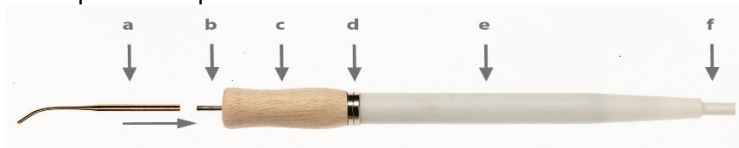

5. Modification of the units, handpieces and probe shapes is exclusively at the operator's own responsibility.
6. interventions lead to loss of warranty and exclusion of liability.
7. Do not use solvents to clean the devices.
8. When returning the instrument - e.g. for repair purposes - pack it unbreakable

4. Operating instructions:

4.1. Before commissioning:

Our waxers comply with the state of the art and the recognized safety regulations, **nevertheless dangers can arise if the device is not handled properly.**

- Only operate the device in perfect condition and in compliance with the operating instructions!
- Observe recognized rules for occupational safety.
- Use by qualified personnel only
- Check the device for technically perfect condition, especially all cables and the housing.
- place the modelling tip(s) required for the next working step on the heating rod
Attach to the handpiece (plug connection)
- Attach the holding clamp, art. no. 410-1002, to the device/table and always keep the handpiece there after use deposit/clamp

- a – Modelling Tip b – Heating Element c - Handle
d - Magnetic Rings e – handpiece d- Cable

4.2. 4.2 Operation:

1. establish mains connection (only connect to approved sockets)
2. remove the dust cover of the Contact E variants and insert the desired wax chip quality ...and equip it.
3. **connect Contact E devices to the power supply. They are ready for use after a short heat-up time. The temperature is controlled by the rotary control/potentiometer located on the top of the metal plate. The desired temperature can be controlled separately for each handpiece. Turning the knob to the left decreases the temperature, turning the knob to the right increases the temperature.**
All Contact E versions have a black slide switch on the back of the unit. This allows the limited heating for the left half of the plate to be switched on or off. The LED on the left side of the unit indicates when the heating is switched on when it is red, but also when the heating is still in the heating phase up to the set temperature. The colour green indicates that the maximum factory-set temperature has been reached.
Contact hot is not equipped with additional handpieces and is used for processing with instruments and separate heat source.
4. pick up wax with the hot tip and place liquid wax drops on the wax crown.
5. use a suitable tool to change the hot tips - danger of burning!
6. if you do not need your device for a longer period of time, please switch it off and always place the handpiece in the intended holding clamp off - danger of burns !
After having removed the protective foil of the adhesive tape, the holding clamp can be placed anywhere on the Take the cable lengths of the handpieces into account.
7. switch off the device when leaving the workplace - danger of burns! Put on the dust cover
8. final storage or packing of the equipment only after complete cooling.

5. Disposal: When disposing of the device, the applicable legal regulations must be observed.

6. Garantie: The company YETI repairs the waxer 24 months from delivery date free of charge as far as it concerns damages due to material defects or manufacturing defects !
Excluded from this are wearing parts like handpieces and modelling probes.

7. Spare parts and accessories list:

Our range of modelling tips from left to right:

411-0100 PKT1 fine
411-0200 PKT 2
411.0300 Hollenback
411-0400 Knife shape
411-0500 Corkscrew fine
411-0600 Corkscrew thick

410-1002 Handle clamp for all waxers
included in delivery

411-1001 Handpiece Contact E devices

411-2020 Balsa Wood Handle parts

Possible assembly with wax chips and other accessories:

see appendix on the next page
