

All-rounder

digi MILL⁵ dry

CAD / CAM wax blank 80

dentin, 16 mm, Art-No. 796-0016

- **can be modelled very well**

- lowered melting point (80°)
- can be combined with cervical wax
- can be modelled with sculpturing wax

- **clean filing without sticking**

- clean scrape down – mirror-smooth surfaces

- **ash-free**

- made of micro wax that burns without residue and is compatible with investment material (temperature stable)

(use a single tooth cutter if dry milling)
