Corundum

& Glass beads

YETI Corundum is a iron-free material with a high level of whiteness, extreme hardness and with a large selection of precise grits. The highest level of cleanliness is achieved by an additional washing process, which noticeably reduces dust formation during the application. Available in 25 kg bags in the grain sizes of 50 my, 110 my and 250 my.

YETI Corundum, white	50my	25kg bag	Art.-No. 922-1050
YETI Corundum, white	110my	25kg bag	Art.-No. 922-1110
YETI Corundum, white	250my	25kg bag	Art.-No. 922-1250

YETI Glass beads are a mineral, iron-free reusable blasting agent. Due to their round grain shape, they have a low abrasive effect and are therefore ideally suited for gentle cleaning/application. The highest value is placed on cleanliness in the production process. Available in 25 kg bag in the grain size 50 my.
